DETAILED ACTION

1. Claims 75-90 are pending and examined. Claims 83-90 are rejoined to the examined Invention.
2. The applicant's Reply, entered 5/30/2006, has been considered. Rejections and/or objections not reiterated from the previous Office action, mailed 11/28/2005, are hereby withdrawn. The following rejections and/or objections are either newly applied or are reiterated and are the only rejections and/or objections presently applied to the instant application.

Election/Restrictions

3. Upon further consideration, the examiner has rejoined the Inventions of Groups I and II, as set forth in the previous Office action, mailed 11/28/2005.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 11/28/2005, (after telephone election) is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the

Art Unit: 1639

provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Priority

4. This application, filed 3/24/2000, is a continuation-in-part of 09/253,153, filed 2/19/1999, now abandoned, which claims benefit of 60/075,629, filed 2/21/1998.

Withdrawal of Claim Objections/Rejections

5. All previous rejections have been withdrawn in view of applicant's arguments and amendments to the claims found in the Reply, entered 5/30/2006.

Claim Rejections - 35 USC § 112, Second Paragraph

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 75-90 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 75 and 83 state the language "a combinatorial library of probe compounds attached at discrete locations", which renders the claims vague and indefinite because it is unclear as to what structure the probe compounds are attached.

Claim 83 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the

Art Unit: 1639

steps. See MPEP § 2172.01. The omitted steps are: testing an analyte having target compounds, (as in the preamble of claim 83).

Claim 83 recites the limitation "probe compounds" in lines 3 and 7. There is uncertain antecedent basis for this limitation in the claim because the relationship of the "analyte", (as in the preamble), and the "probe compounds", is unclear.

Claim 83 recites the limitation "a length of the optical fiber" in line 4. There is uncertain antecedent basis for this limitation in the claim because it is unclear how an optical fiber can have more than one length.

Claim 86 in line 3, states the language "to interact with multiple different probe molecules", which renders the claim vague and indefinite, because it is unclear as to what does the interacting.

Claim 89 states "light interacting with different of the probe molecules", which does not appear to make sense.

Claim 90 recites the limitation "the received light" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

8. Claims 75-90 are rejected.
